About me

I am an Information Technology student at Rajamangala University of Technology Lanna Lampang. I have basic skills in web development and programming such as Node.js and MySQL. I am interested in learning new technologies and improving my skills to develop useful digital systems. I am responsible, eager to learn, and ready to gain new experience in the field of IT.

PROJECT

• Personal Expense Management and Savings Planning System

2026

A web-based application designed to help users manage their personal finances more efficiently. The system allows users to record and analyze their income and expenses, track spending habits, and plan savings goals. It integrates Optical Character Recognition (OCR) technology to automatically extract information from receipt images, reducing manual data entry and improving accuracy. The application is developed using modern web technologies and supports secure login through LINE, enabling users to conveniently access the system and monitor their financial activities through their mobile devices.
